Skills

- JavaScript | Vue | Ruby on Rails | React | SQL | Docker | NextJS | Node | NestJS | TypeScript | GO | IA | Python | PHP | OpenAI API | Firebase | LLM Integration | Vite | Azure | Clean Code | Git
- Jest | Cypress | XUnit | CI/CD | Unit Testing | SOLID | DRY | SCRUM | Agile | OOP
- Frontend | Backend | Full-Stack | Microservices | Proficiency in Portuguese & English | Advanced Spanish

Experience

Software Engineer

[HiPeople](#)

Berlin, Remote

07/2025 - Present

- Build and scale **AI Hiring** features using **Generative AI** (OpenAI, Gemini) and **NLP** across 4 AI native products
- Led a front-end performance overhaul, reducing the **initial JavaScript payload** by **65% (>1 MB)** and increasing **Lighthouse** Performance from 18 to **60+** through lazy loading, **dynamic imports** and **optimized chunking**.
- Reduced weekly production errors by **85%** through proactive monitoring, root cause analysis and targeted reliability improvements.
- Own **end-to-end product development** with **React**, **TypeScript**, **Next.js** and **Golang**, leveraging **AI-augmented development** workflows to ship production-ready features faster.
- Partner with **Product**, **Design** and customers to deliver impactful product improvements. Thrive in a high-velocity engineering culture with **daily shipping**, multiple deployments per day and **CI/CD** and **Support** scalable infrastructure with **MySQL** and **Docker**.

Mid-Level Software Engineer

[Fullstack Labs](#)

Chicago, Remote

11/2024 - 07/2025

- Collaborated with an **international and cross-functional team** in the development and maintenance of the **BenchPrep** certification platform, using **Vue**, **Nuxt**, **Vuetify**, and **Ruby on Rails**, delivering scalable interfaces from **Figma**.
- Managed **PostgreSQL**, **Docker/Kubernetes** environments, and created **E2E test pipelines** with **Jest**, **Cypress**, and **RSpec**.
- Optimized the **CI/CD** process with **Codefresh**, increasing test coverage by **10%** and implementing **integration tests** that covered **70% of Docker-based endpoints**, following **TDD** and **Agile methodologies**.

Full-stack Software Engineer

[Minha Visita](#)

Novo Hamburgo, RS (Hybrid)

09/2021 - 11/2024

- Built and maintained a **cross-platform management app** with **Vue**, **Vite**, **Quasar**, and **Capacitor**, creating **UX-focused** interfaces from **Figma**. Scaled **Mercado Pago** integrations handling **~R\$50K daily flow**, and optimized **CI pipelines**, improving build speed by **75%**.
- Developed **backend APIs** with **NestJS**, **PHP**, **Firebase**, **Redis**, **GraphQL**, and **MySQL** under **Agile/SCRUM**.

Fullstack Developer Trainee

[Scopi](#)

Taquara, RS

01/2021 - 09/2021

- Contributed to Scopi, a strategic planning platform, developing new modules with **AngularJS**, **Firebase**, and **React Native**.
- Maintained and structured APIs in **Rails** and **Node**, handling **MongoDB/SQL** operations and **AWS** environments under **Agile/SCRUM**.

Education

Technologist in System Analysis and Development

[Unisinos](#)

São Leopoldo, RS

03/2021 - 2025

- Focus on System Analysis and Development; consistently high academic performance.

Integrated Technical Course in Informatics

[ETEC Monteiro Lobato](#)

Taquara, RS

03/2018 - 12/2020

- Foundational training in programming, logic, and web development.

Projects

- **JSON Searcher: Visual Studio Code extension** used for searching paths within JSON files, with over 1100+ downloads.
- **Interactive Portfolio:** My interactive and responsive portfolio, developed with **Vue**, **Vite**, and **SASS**, available at matheusdias.dev

Others

- **Freelance Developer:** Developed websites and platforms as a freelancer, using **WordPress** and **Vue** (2021 - present)
- **Languages:** Portuguese (Native) | English (Fluent – MET Certificate) | Spanish (Intermediate)
